DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 13 – 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Davis et al (USPN 6282522) (Davis) in view of Kuo (USPN 6847953).

Re Claim 13-24: Davis teaches a method of making a financial transaction over the internet comprising: electing, by a purchaser, to pay for selected items from a merchant by credit card means using a virtual credit card terminal (VCT) comprising credit card means reader, a digital processing device operatively associated with said credit card means reader and encoding transaction programs that allows opening of an interactive terminal window for processing of the transaction, and wherein said virtual credit card terminal is registered with a VCT gateway (col.

Art Unit: 3691

7, lines 7-10); providing the purchaser with a transaction number from said VCT gateway (col. 13, lines 58-59), a merchant identification and an amount to transact from the merchant, wherein said merchant is registered with said VCT gateway (col. 13, lines 60-61); entering, by the purchaser, details of credit card means into the virtual credit card terminal to facilitate formation of a VCT transaction request (col. 14, lines 1-7); sending the VCT transaction request to said VCT gateway (col. 14, lines 1-7); providing, by said purchaser, the merchant with delivery details; and providing, by said merchant, said purchaser with a merchant receipt (col. 14, lines 62-65)

Davis does not explicitly teach processing the VCT transaction request by the VCT gateway to facilitate formation of a bank transaction request; sending the bank transaction request from the VCT gateway to a bank; processing the bank transaction request, whereby advice is sent from the bank to the VCT gateway as to whether the transaction has been approved; and sending the advice from the VCT gateway to the merchant and the purchaser; wherein if the transaction has been approved, providing the merchant and the purchaser with a transaction authentication code; Kuo teaches processing the VCT transaction request by the VCT gateway to facilitate formation of a bank transaction request; sending the bank transaction request from the VCT gateway to a bank; processing the bank transaction request, whereby advice is sent from the bank to the VCT gateway as to whether the transaction has been approved; and sending the advice from the VCT gateway to the merchant and the purchaser (Fig. 1, col. 7, line 55 through col. 8, line 4). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify Davis to include these steps as taught by Kuo. One would have been motivated to do so in order to

Application/Control Number: 09/955,544

Art Unit: 3691

ensure that the transaction is valid and the purchaser has sufficient funds to complete the transaction.

Official notice is hereby taken that the step of providing the merchant and the purchaser with a transaction authentication code if a transaction has been approved is old and well known. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify Davis to include this step. One would have been motivated to do so, so that the merchant can verify the authorization code provided by the purchase.

Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a) Fox et al (USPN 5790677) disclose a system and method for secure electronic transaction (Figures).
- b) Hughes et al (WO 96/04618) disclose a system for remote purchase payment and remote bill payment transactions.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Olabode Akintola whose telephone number is 571-272-3629. The examiner can normally be reached on M-F 8:30AM -5:00PM.

Application/Control Number: 09/955,544 Page 5
